It's easy to catch a cold in spring. Here are some ways to help you to keep away from it.

Firstly, you'd better do some exercise every day. In the evening, you can walk in the garden for half an hour after dinner. If you think it is a little boring, you can also go shopping with your friends, in order to reach the aim of doing some exercise. Secondly, have balanced diets. Have your breakfast at eight and please remember that breakfast is the most important meal. You should eat some nutritious food then. Eat the most in lunch, because it can provide the whole day energy. In the evening, you should eat a little, and eat before six o'clock. Thirdly, have enough sleeping hours. If you can follow what I tell you, I believe you can have a very good body and live happier.

If you follow these suggestions, you may get away from the illness.
